## Message from the Director

*Debbie Ridgely*  
OSDBU Director

The calendar tells us that it is spring and the trees and flowers are in bloom. So are the outreach opportunities that the HHS OSDBU will be offering. On April 13, 2011, HHS will be in Atlanta, GA, with our partner the General Services Administration for "Getting Back to Business" Industry Day. As part of the Small Business Jobs Act of 2010, this outreach event is supported by the White House. The session will feature training and one-on-one meetings for the small business community. Our second White House event will be a "Marketplace" held on June 1, 2011, in Raleigh, NC with our partner the Environmental Protection Agency. Small business vendors will have the opportunity to market their products and services to the Government representatives.

In this issue we feature CORE Solutions, a successful Small Disadvantaged Business, founded in 1999. The vision of the Substance Abuse and Mental Health Services Administration (SAMHSA) inspired CORE to create an innovative product that provides real time data from millions of health care clients in three states. Their product is the market leader in Electronic Health Records (EHR).

Be sure to come visit us at the 21st. Annual OSDBU Directors' Conference on April 21, 2011, at Dulles Expo Center. It is one of the best "one-stop" shopping events all year. HHS will also be at several upcoming Veteran's conferences, as well as, GSA's Training Conference and Expo in San Diego and the US Pan Asian American Chamber of Commerce Conference in Los Angeles.

# SAMSHA Inspires CORE to Develop a Unique Solution in Electronic Health Records

**T**he Substance Abuse and Mental Health Services Administration's (SAMSHA) vision regarding the future of health care inspired Ravi Ganesan, President of Core Solutions, Inc. (CORE), to create an innovative product which is now providing real time data from millions of health care clients in three states. The data is then consolidated and sent to SAMSHA. Dr. H. Westley Clark, SAMSHA Director of the Center for Substance Abuse Treatment, U.S. Department of Health and Human Services, shared his vision on the future of health care in an informal meeting which included Anne Herron, SAMSHA Director of Division of State and Community Assistance and other staff members. This informal conversational exchange helped CORE understand the needs at the federal, state and county level. "Dr. Clark galvanized us," said Ganesan. "When someone is passionate, it rubs off on you. You feel the need to do something. He challenged us to develop new solutions. As a result, we created and implemented a new product which is the market leader in Electronic Health Records (EHR)."

The CORE Cx360 is the first (and perhaps only) cross agency case management system that includes an EHR in the market today.

The product is unique in that it provides the ability for any county, state or federal agency to collect and manage case data in all areas of healthcare. Furthermore it allows this data to move, intact and in real time, to other agencies. "For example, if a child is being serviced in a "Birth to 3" program and also interacting with the health department, the education department and the welfare department – a single record for that child is created and updated across all agencies. Data collection efforts (and potential errors) are minimized, thereby reducing costs and staff time while vastly improving outcomes," explained Ganesan. "All agencies working with that child and their family have complete and current data that provide for a more comprehensive and effective continuum of care while controlling costs," he added.

**Core**

## SAMSHA Inspires CORE to Develop a Unique Solution in Electronic Health Records (cont.)

Working regularly with SAMSHA staff has assisted CORE in anticipating what needs are not being met. "As a small business, our advantage is that we can develop and implement new products quickly to meet market needs," stated Ganesan.

"We look forward to continued growth as we enhance the Cx360 system. We are particularly appreciative of the advice we've received over the last two years from management and staff at SAMSHA and in particular Dr. Westley Clark and Ms. Anne Herron," Ganesan added.

Philadelphia Business Magazine recognized CORE as one of Philadelphia's fastest growing privately held corporations in 2010. The company also caught the interest of Ben Franklin Technology Partners of Southeastern Pennsylvania, a national, award winning model for technology innovation invested in innovative enterprises. They have provided financial backing to CORE.

Founded in 1999, Core Solutions, Inc. (CORE) is a market leader in providing electronic health records (EHR) technology for the behavioral healthcare and human services industries. Headquartered outside of Philadelphia, CORE offers a comprehensive enterprise suite designed to fit the needs of its clients and brings providers the training, services, and expertise, which are a result of more than ten years of experience. The company's solutions securely automate the collection, distribution, processing, reporting, and analysis of administrative, financial, and clinical client data for internal staff and external stakeholders. CORE is a Small & Disadvantaged Business. For more information visit: <http://www.coresolutionsinc.com>

# HHS Day at the Seventh National Small Business Federal Contracting Week is Successful

**T**he U.S. Department of Health & Human Services (HHS) was spotlighted March 31, 2011 as part of the Seventh National Small Business Federal Contracting Week in Washington, D.C. The all day event was sponsored by the U.S. Women's Chamber of Commerce and the National Association of Small Business Contractors.

Debbie Ridgely, Director of the HHS Office of Small & Disadvantaged Business Utilization Office (OSDBU) presented an overview of the Department and highlighted women-owned business opportunities with HHS to several hundred women-owned business owners.

As part of the event, HHS staff members provided tips on how to market to HHS. In addition, they explained the HHS strategic sourcing initiative, which includes the new Women-Owned Small Business Federal Contracting set-aside program.

Navigating the federal contracting waters can be difficult for small businesses, so HHS staff outlined Simplified Acquisition opportunities and furnished insights on how to establish successful relationships with prime contractors. The afternoon afforded attendees the opportunity to have one-on-one meetings with agency and prime contractor representatives.
